RE: How To Build A Flagstone Patio & Walkway

Dear Homeowner,

If you're planning on laying a flagstone patio or walkway then it's very important you know exactly what you're doing. There are many important steps you need to know before attempting to build a natural flagstone patio. Not knowing these steps can quickly turn a small flagstone project into a long and expensive flagstone project.

Here's the problem many homeowner face right now...

Homeowners will often do some searching online for **"How to lay flagstone"** and find numerous DIY sites which in most cases have a short step by step flagstone patio installation guide to follow. I've spent a hours reading and researching these short instructional how to guides and quite frankly they make me laugh.

The Main Problem: They don't cover 75% of the steps and techniques you need to know when building a flagstone patio or walkway.

But it's worse than you think! Here's why...

Not knowing how to install a flagstone patio correctly can become very expensive and result in having a poor and embarrassing looking flagstone patio, plus you'll probably never use the patio because all pieces of flagstone will be uneven and move/rock when walked on. Patio furniture will sit on 2 or 3 legs instead of 4.

Take a look at the flagstone installed in the picture on the right. It's a good example of how to lay flagstone correctly.
