

Easy Speed PC - Optimize Your PC With Ease

[More Details](#)

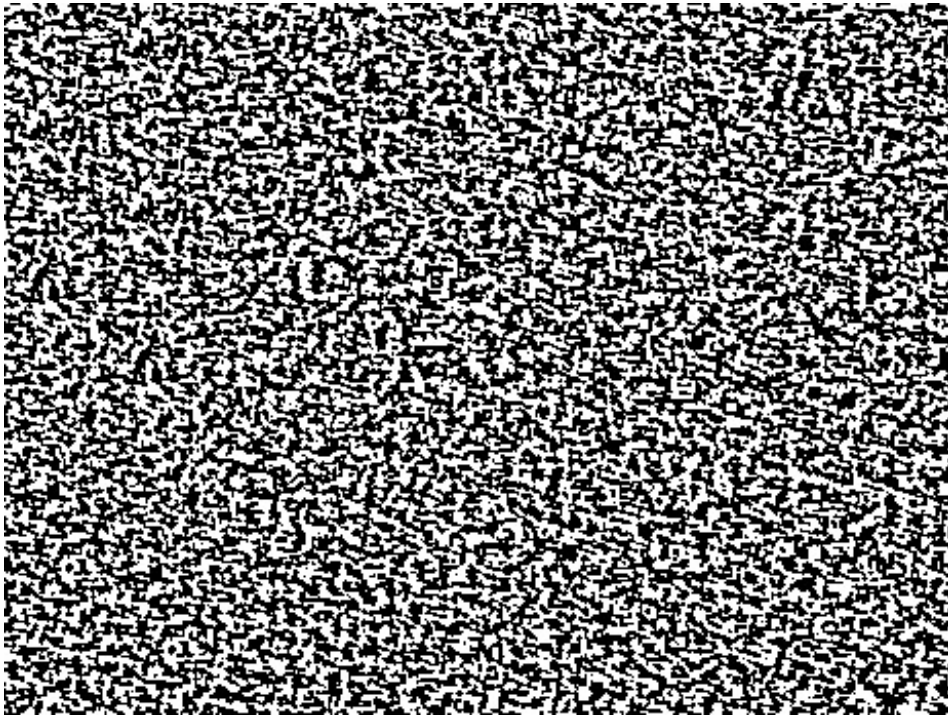

The screenshot shows the Easy Speed PC website. At the top is a navigation bar with links for Home, Download, Features, Purchase, and Support. The main content area features a large heading 'Easy Speed PC' followed by a sub-heading: 'With a few simple clicks, you'll be able to find the errors on your PC! Easy Speed PC is simple to use and can solve several problems with your computer.' Below this are three sections, each with a green heading and a paragraph of text:

- Does your computer freeze up and crash?**
Running just a few programs simultaneously can cause your computer to freeze up and require a restart. This is extremely frustrating! Don't worry – Easy Speed PC can free up your computer's disk space and get rid of old files and clutter to improve your computer's overall function and allow it to operate at peak performance.
- Is your computer slow to start up and respond?**
There is no reason for you to have to wait and wait for your computer to load. Registry errors and running too many programs can cause your computer to take extra time to load and respond. Easy Speed PC can identify these issues and help you fix the culprits.
- Do you need extra privacy protection?**
Easy Speed PC can give you the extra coverage you need to protect your privacy from existing virus protection. With the ability to track and delete tracking cookies and scan downloaded files for malware, you can be sure your computer is protected.

On the right side of the page, there is a 'Highly Recommended Download!' badge with a 4-star rating. Below this is a green 'Download Now' button for Windows 8, 7, Vista, and XP. A screenshot of the software's interface is shown below the button, displaying a 'Welcome to Easy Speed PC' message and a 'Start Scan' button. At the bottom of the page, there is a red button with white text that says 'Click Link Below' with arrows pointing down, and the text 'Compatible with Microsoft:' to its right.
