

FileCure

"I do not know what Corporate level you are seated, but trust me, with service like this and a great product, ParetoLogic is a success. I am very happy I purchased your product."

Brian Rupp

Get what you need to open your files

Can't open a file?

If you can't get a file to open, you need ParetoLogic FileCure. This comprehensive file-problem software identifies the unknown file's format and helps you get the software you need to open it. Fast and easy to use, you will wonder what you did before you had ParetoLogic FileCure.

What kind of file is it? With email, flash drives and other methods and devices, files are traded quickly and easily these days. That means many computer users encounter a wide variety of file types - many of which they might not know. A key to working with a file is first figuring out what it is. A key is the file extension. This short suffix usually follows the filename and indicates the file type. Common file extensions include docx, pdf, rar, mp3, and jpg.

You don't have to know all the file extensions. ParetoLogic FileCure takes care of it for you. It analyzes the file to see what its type is and which software it requires. As well, you can just type in an unfamiliar file extension and ParetoLogic FileCure will tell you the format and help you get the program you need. It also has a variety of other useful features.

File won't open? Get FileCure!

- ✓ Analyzes files to identify types and formats
- ✓ Find the software you need to open files
- ✓ Well-labeled interface makes it easy to use
- ✓ Change software/file type associations
- ✓ Monitors file associations to prevent frustration
- ✓ Fix extension problems in Windows registry

[Click to download](#) and install ParetoLogic FileCure. This utility will find out the format of unknown files.

Testimonials

"I cannot say this any louder, or more often but your customer service is a Top example. I do not know what Corporate level you are seated, but trust me, with service like this and a great product, ParetoLogic is a success. I am very happy I purchased your product."

Brian Rupp
[Try FileCure Now >](#)

"Your instructions on downloading and licensing FileCure and XoftSpySE were very easy to follow. I now have both programs. I want to complement you on two good programs that do exactly what they claim to do (I've run them both.) Also thank you for your excellent support
