**Sales of Kindle Books Are Hot, Hot, Hot!**

Amazon sells millions of new Kindles every quarter. And every one of those millions and millions of Kindle owners are hungry for Kindle books. For that reason, ebooks now outsell physical books and experts predict that this trend will continue indefinitely.

Every author that I know sells many more Kindle books than physical books. Many of them say that they sell 10 times as many books for Kindle as they do physical books.

In fact, a number of authors no longer publish physical books, they offer their books only on the Kindle. Why? It can cost thousands of dollars to publish a physical book, but you can publish a Kindle book absolutely free.

**But There Is A Problem**

Getting the Kindle formatting right is quite difficult and the instructions are really confusing! Think I'm kidding? There are **291 pages** of formatting questions on Kindle's Community website. That works out to over 4,000 posts on how to format a Kindle book.
