Well, here it is. The ZeroFossilFuel Rocket Stove Heater. This page will probably end up becoming a work in progress because I'll be tweaking here and there, maybe even adding a pellet hopper. Directly below are links to the current outline I wrote up in PDF and YouTube video playlist. It is my sincerest hope that this helps many to become more energy independent and inspires them to build.

**Zero's Rocket Stove Guide** (right click to save PDF)  
**YouTube video playlist** for my Rocket Stove. 6 videos in all.

The information above is free, open to the public and all you need to recreate my design. For just \$20 you can also get my full 30 page set of measured blueprints, animated 3D Solidworks model, high resolution photo album of the entire project start to finish, a deleted blooper video when things went horribly wrong (funny in hindsight, not so funny then) and my eternal gratitude.
